Session Description:
This interactive review session will provide updated information pertinent to surgical oncology in preparation for the CGSO QE and CE examinations, including core knowledge presentations, oral board examination advice, and practical advice with feedback. Participants will also review updated NCCN algorithms and new/sentinel trials in surgical oncology. This review course is open to all surgical oncology fellows, residents, and junior faculty, and complements the resources found in SOSAP. This course can also serve as a refresher for any interested attendees currently in practice.
